## Annual Training

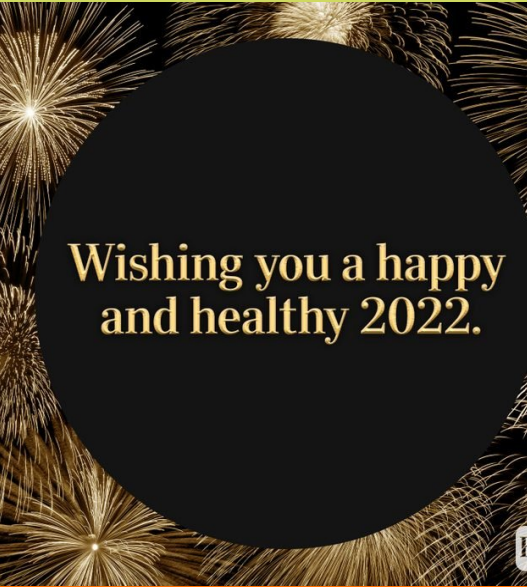

T & T Tutor World, Inc. will provide training in a virtual format, Goto Webinar, again this fiscal year. To attend the virtual training, you must register using the links below.

All homes and centers with staff who have CACFP duties must attend training annually. Each person must login to the webinar using his/her own email address to view the training. This will ensure each person receives credit for the training to stay in compliance. Again, all staff who have an assigned CACFP duty, and are paid with CACFP funds, must attend training. The training Webinars are as follows:

- Identifying Whole Grain Rich Foods in the CACFP January 19, 2022  
<https://attendee.gotowebinar.com/register/5488202812668941067>
- Recordkeeping February 16, 2022  
<https://attendee.gotowebinar.com/register/6212662228117479947>
- Civil Rights/ Serious Deficiency Process March 16, 2022  
<https://attendee.gotowebinar.com/register/7007427715580701200>

Keep in mind, you must be in attendance for all three virtual trainings to satisfy your food program FY 22 training requirement.

***Our mission is to seek licensed child care homes and centers to offer them USDA funds to serve nutritious meals to children ages 0-12 and to stamp out obesity and food insecurity.***

Wishing you a happy  
and healthy 2022.

# Updates

## Emergency Funds

USDA's Emergency Funds have been issued to NC and DC providers and centers. We are currently waiting on the SC State Agency to release these funds to us to disburse to eligible homes and centers. Once we receive an update on this, an email will be sent immediately to SC providers and centers.

## Connection Calls

We will not have any conference calls this month. We will share any and all updates at the end of the training session held January 19, 2022 at 1pm.

## Enrollment Forms

Remember to submit your enrollment forms to the appropriate email address per the enrollment policy but no later than the last day of the month.

## Using Ounce Equivalents for Measuring Grains in the CACFP

The implementation for measuring grains using ounce equivalents began October 1, 2021. As a reminder, see the information below that you will need to ensure proper performance of measurements.
